## YOUTUBE CHANNEL MONETIZATION

- YouTube monetization is basically a process of generating money through the videos you share online on any of the YouTube authorized platforms. This is normally accomplished through memberships, advertising, or direct exchanges.
- In simpler terms, video monetization is essentially getting paid for the videos you make. Individuals watch, participate in, or buy-in, and you get paid an aggregate amount of cash for it. The more people who watch your videos (or the more supporters you have), the more you acquire.
- AdsTube offers you the chance to profit from your YouTube videos. You have to initially build an audience that engages with your content, which essentially implies you are required to have videos turning out not exactly at regular intervals, and you need people to drop comments, like them, subscribe, and share your channel's content.

We have plans that will make you profit from your youtube videos.
